2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

- **1. Introduction**
- **1.1. Abstract**
- The presenter's elective, conversation-oriented university beginners' German as second foreign language course concludes with a year-end oral exam. After only two terms of thirteen weeks each of 90-minute classes (meeting twice per week), learners speak with a new native speaker in the target language for two to three minutes in person or via a Skype conference. However, in order to optimize the course and in cases where no native speakers are available, advanced learners may be an alternative as exam raters and/or speaking partners. This study reports on an experiment where a continuous learner with the presenter and a returnee were employed in such a way.

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

- In particular, part one briefly introduces the background and the aim of the two studies presented below, as well as the theoretical approaches and practical preparations to employing learners as well as the hypothesis that they can appropriately rate and serve as speaking partners, and methods to research this.
- Part two presents study one with a student as a rater, who had recently returned from a one year stay in the target language country.
- Part three presents study two with a continuous student with the author as speaking partner.
- Each study gives a recorded demonstrative example with a first year student at the presenter's Ehime University. Each study presents support for the hypothesis from the results of the cases so far in terms of content, inter-rater correlation and severity.
- The concluding part four mentions advantages and disadvantages of this approach, and outlines the future development of a course program integrating this in advanced courses presently being developed by the presenter at his university into a revolving system.

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

- **1.2. The goal of foreign language learning**
- The utter goal of learning to speak a foreign language is a conversation with a native speaker or advanced habitual user of the target language other than the teacher her/himself. The same holds for being rated in an oral exam. While for English, native speakers come by easily in Japan, other languages such as German often encounter shortages, although the ubiquity of digital media such as Skype, has alleviated the situation somewhat.
- As one way out, the author has tried to employ comparably advanced learners of German as raters (SR) and speaking partners in the German as second foreign language first year general studies year-final oral exam at Ehime University.

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

- **1.3. Terminology**
- **Student assistant**
- From Wikipedia, the free encyclopedia: Jump to: [navigation](#), [search](#)
- **Student assistant** may mean:
 - - A student member of a college [coaching staff](#)
 - - A student [teaching assistant](#)
 - - [Resident assistant](#), a trained peer leader, within a college, university, or group housing facility
 - - A student working as a support assistant for the faculty and staff. Student assistantship is generally a part-time position. Job description includes technological support, in-class assistance, first-level computer support, etc. Student assistants are also supposed to establish a good rapport with the faculty so that the faculty will not be disturbed and shy by their IT-related problems. On the whole, it is quite demanding
- - student assistants?
- - peers? ←
- - here students as raters and speaking partners in the oral exam(Lsp)
- - using, employing,

1.4. Introduction to the course

- Brief introduction of the German course, the oral exam and its main characteristics

1.4.1. Unfulfilled conditions of the course in this study

- **An intensive course** (intensive コース集中講座)
 - **speaking course** (口頭表現を目的とする専門コース)
 - **students majoring in this 2nd fL** (その未習外国語の専門学生向け)
 - **student with a special interest in the 2FL**
(その外国語に対してそもそも強い興味を持っている者)
 - **students taking the course as a selective**
(必修課目として取っている)
 - **more than two 90 min. units per week**
(週2回90分以上の場合)
 - **high ranking universities**
(上級大学)
 - **team teaching**
(細かく合わせたteam teaching)
- And a few other characteristics supportive of FL learning**
(又はいくつかの外国語習得を助ける性格を持っている要因)

1.4.2. Defining the overall main goal of university 2FL education

- defined by Reinelt (2008b) as sufficient training in the five abilities of speaking, writing, listening, reading comprehension, and translation, as well as in the learning techniques to acquire these. The course should also enable the learners to make abstractions and analyse intercultural phenomena pertaining to what is dealt with in class. A further requirement is making the best use of technical developments for speaking.

1.4.3. Brief introduction to conducting the German course

- - 1 class per week 90 minutes 13 of 15 weeks
- - 1 class has 5 to 7 units of about 15 to 20 minutes
- - student practice speaking new content two weeks before writing is given and practiced
- - partner teacher, but alignment difficult
- - student nrs. vary between 10 and 30 (-2012), up to 60 this 2013 SS term)
- - starting from . All is new!
- - in class: speaking > others: moodle/e-mail/ others

1.5. Background to the oral exam

- After only two terms of thirteen weeks of 90-minute classes (meeting twice per week), learners speak spontaneously with a new native speaker in the target language for two to three minutes in person or through a Skype audio/video conference.

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

- - *the oral exam: main characteristics*
- - second to last class: Everything so far in a row as an encounter (speaking: 7 to 10 to 15 mins.of German)
- - test much shorter
- - oral exam 14th or 29th class
- - students called into the exam room individually
- - students wait, speak, return
- - speaking partners: German native speakers (NS) except the course teacher, in person or over Skype
- - students speak spontaneously (no preparation) with a new person for 2-3 mins.
- - rating: criteria referenced (NS) (scorecard)and holistic (RR)
- - the others solve a free writing task

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

- PROBLEM sometimes not enough raters and/or speaking partners available
 - - other teachers (experience?)
 - “Video conferencing” allowed us to employ native speakers from everywhere. as both
 - - raters
 - and
 - - speakers
- > unlimited opportunities

Next step: What to do when all this does not work?

Overcoming issues resulting from CALL

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

- employ somewhat advanced student(s):
- -- a) have stayed in the target language country for a longer time
- -- b) have taken RR's courses and the same oral exam previously
- Lucky in WS2011: Returning student MS > SR
- For the following: Remember feasibility

1.6. Possible lack of raters/speakers for 2FL oral exams

Employing students learners (peers) as raters and/or speaking partners Lsp with the **hypothesis** that:

Learners (Lsp) who

- *have experienced the same exam, and*
- *retained their 2FL*

can function as rater for and speaking partner with other learners adequately.

2. Study 1: Peer students as raters

Theoretical approaches

- to rating oral exams

Eckes (2006):

when rating productive skills there are wide rating differences even among professionals

but:

rating productive skills bogs down to three important factors:

- ability of the testee student
- the inter-rater correlation
- the raters' severity

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

Last year we were lucky: Returnee MR

New student rater MR's characteristics:

- - spent one year in Freiburg (Southern Germany)
- - speaks German slow but very well (B1 to B2)
- - here as rater (criterion referenced)
- - no training

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

- Further refining the hypothesis
- MS's scores will not considerably deviate from other rater's scores
- scoring: scoreboard as in the German school system (1= very good >>>5= fail)
- deviation: no professional >
- *interrater correlation* ICC2k: 70% o.k.?
- *severity*: within 1 degree (out of the 5)

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

- This small study:
- MS as rater (together in the room with the others: speaking partners, observers and raters, and the waiting student
- 16 dyads: Si and one speaking partner
- Speaking partners supposed to be equivalent

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

- Lets see one example:
- - the criterion-referenced rating scale developed by the author
- - set-up of equipment
- - starting scene screen shot
- - transcript
- - results and discussion

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

Criterion referenced rating

Need to develop own system for 2FL German

The scoreboard on the right was developed in accordance with Jeffrey scoreboard for this university (Reinelt 2007)

Weighing of criteria variable, e.g. as in the brackets

Aussprache = pronunciation (15%) a)

Korrektheit = correctness, grammar (15%) b)

Wortschatz = (richness in) vocabulary (20%) c)

Fluessigkeit = fluency (35%) d)

Gegenseitigkeit = mutuality, dialogicity (15%) e)

		(MH JS RR)=0.45	X
		(MH RB)=0.42	X
		(MH RB RR)=0.07	X
		(MH RR)=-0.16	X

Severity

- measured as the average of all raw points attributed by one rater to all students divided by the number of students
- should not be considerably higher or lower than the native speaker raters

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

- Are MS's scores similar to the other raters?
- Severity per rater

rater	severity
MH	2.64
JS	1.98
RB	1.79
MS	2.45
RR	1.5

Discussion

- - used German rating system (probably not familiar)
- We may, with all necessary restraint, say that employing MS was successful as none of the hypotheses was outright refused.
- With other student raters: More research necessary (as with other non-student raters)

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

- **Conclusion and future vistas**
 - Solves the rater problem at least for emergencies
 - As only students qualify who have passed this oral exam, students may also be able to serve as oral exam speaking partners (see study 2 here below)

3. Study 2: Peer students as speaking partners

Aim of this study

In order to optimize the course and in cases where no native speakers are available, advanced learners may be an alternative as exam speaking partners. This study reports on an experiment where a continuing learner with the presenter was employed in such a way.

practical preparations to employing learners as speaking partners (Lsp)

- Pre-conditions
- - Lsp has experienced the same oral exam
i.e. knows the realm of contents
i.e. has an idea of how the exam is conducted
- - Lsp has continued learning, so he/she is at least on the same level as the student in the exam
 - difficult, since forgetting sets in early in the second year with only one class once a week

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

the **hypothesis**:

- that Lsp can appropriately rate and serve as speaking partners
- (experience from the try with student raters before, here above as study 1) (JaltShikoku 2013)

that Lsp can cope with the rating system (as above):

- pronunciation, grammar, vocabulary, fluency, dialogicity
- German point system from 1 (very good) to 5 (fail).

Subhypothesis:

- - SH1) presupposes that the Lsp can handle the score card
- - SH 2) The Lsp have an acceptable inter-rater correlation
- - SH 3) The Lsp score with a severity similar to the other raters

In practice: Serving as speaking partner

- In the oral exam, native speakers of the target language (German) will alternate speaking with the testees. Lsp will be one among the speaking partners.

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

- **methods** to research this:
- (ideally: several Lsps)
- 1) compare the content of the Lsp and testee dyads with the content of other dyads
- we can suppose that the Lsp-testee dyad contents is similar to the native speaker-testee dyad contents:
- -It is a first talk (its social function is the same as with a native speaker)
- - first talk contents is always limited to a certain number of items and ways to express them revealing the testee's abilities

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

- 2) The inter-rater correlation
- as measured by ICC3k
- should not be considerably lower than with the native speakers
- 3) severity
- measured as the average of all raw points attributed by one rater to all students divided by the number of students
- should not be considerably higher or lower than the native speaker raters

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

- **Recorded demonstrative example** with a second year student at the presenter's Ehime University.
- - the criterion-referenced rating scale developed by the author is the same as in study 1
- - ditto for inter-rater correlations and severity
- - set-up of equipment
- - starting scene screen shot
- - transcript
- - results and discussion

2013 Reineelt Peer Stud as raters and sp partn JESuJaltCALL

039	Ich trinke gern Tee und Kaffee <i>I like to drink tee and coffee</i> (4:23)	040	RR Okay , machen wir soweit <i>O.k. that's all</i> (4:25).	

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

- **Results and discussion: support for the hypothesis**

from the results of one case in terms of content, inter-rater correlation and severity.

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

comment to the example:

- - brief example (many students to test)
- - not ideal in order to show differences between raters
- - stopped as soon as minimal passing conditions were fulfilled

contents (SH1)(1)

- Lsp(RH) as initiator:
- 021 RH Am Samstag(2:27)bin ich/bin ich Matsuyama Schloss gehen *On Saturday, I went M castle (2:35)* und am Sonntag habe ich Unterricht.. gehabt *and on Sunday I had ..class (2:43)*.
- 022 S1 Hm(nickt verstehend *nods in understanding*)
- 023 RH Und Sie *and you?(2:47)*
- 024 S1 Eh,(2:49) am Samstag bin ich Einkaufen mit meiner Familie on Saturday, *I have shopping with my family (3:02)*ge/gesehen *se/seen*.
- 025 RH (nickt)(*nods*)
- 026 S1 gegangen *gone (3:10)*
- -> S1 reacts correctly (contentwise)

contents (2)

- Lsp (RH, the student on the left in the transcript and the video scene) correctly answers a testee initiated exchange (first term):
- Was essen Sie gern?*what do you like to eat?*(3:47)
- 030RR Hm(*confirming*)
- 031RH Ich esse gern *I like*
(3:48)Schokoladekuchen und Kaese *chocolate cake*
and cheese (3:53)

2013 Reinel Peer Stud as raters and sp partn JESuJaltCALL

- ICC (SH2)
- Used ICC3k with RK-Ward

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

ICC (SH2)

Three rater's raw scores , average, EhU-transformed points

2	3	2	3	2	2.5	80
2	3	2	2	3	2.3	83
2	3	2	2	3	2.3	83
hol.RR						76

2013 Reinelts Peer Stud as raters and sp partn JESuJaltCALL

	RH (=Lsp)			
0.56	RH	KN		
-0.7	RH	SW		
0.84	RH	RR		
-0.2	RH	KN	SW	
0.75	RH	KN	RR	
0.1	RH	SW	RR	
0.3	RH	KN	SW	RR

2013 Reinel Peer Stud as raters and sp partn JESuJaltCALL

For comparison: KN (native speaker present in the room)

		KN							
	-0.46	KN	SW						
	0.5	KN	RR						
	-0.28	KN	SW	RR					
	0.56	RH	KN						
	-0.18	RH	KN	SW					
	0.75	RH	KN	RR					
	0.3	RH	KN	SW	RR				

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

- Obviously, there are problems here
- Explore again

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

- severity

KN	2.05
SW	2.45
RH	2.13
RR	75 (=2.6)

- Obviously, RH, the Lsp, is a little less strict than the others, but not stricter than KN

4. Conclusion

The concluding **part four** mentions advantages and disadvantages of this approach, and outlines the future development of a course program integrating this in advanced courses presently being developed by the presenter at his university.

4.1. Advantages and disadvantages of this approach

- ICC numbers have to be checked each time
- Peers can probably replace native speaker partner in emergencies
- Is it fair to others who had to cope with a native speakers ?
- no exit polling here

4.2. S2

- The presenter created a new course in the *general education* department:
- students can now take German there until they graduate.
- The course is aiming for B1
- The results will be represented on the graduation transcript as *hatten kamoku*

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

	Course	CEFR	
1st year	German I	A1 to A2	
2 nd year	S1	trying to approach B1	
3 rd year	S2 (1)	B1?	take as learner
4 th year	S2(2)	B1?	take as teacher teach contents

2013 Reinelt Peer Stud as raters and sp partn JESuJaltCALL

4.3. A revolving/recycling system

If this system works out, it becomes a revolving system by producing its own raters and speaking partners (for emergencies).
