Rudolf Reinelt gives hints for adjusting a German speaking examination to yet other FLs.
The presenter , in "Adjusting the RR Speaking Examination to other foreign languages ", describes the teaching and testing specifics and preconditions for this transfer.

Includes ample materials

Rudolf Reinelt, "Adjusting the RR Speaking Examination to other foreign languages"

This presentation introduces the author's speaking examination and explores its application to other foreign language teaching contexts. In this examination, developed in the author's German first year courses at Ehime university, learners of a new FL speak with native speakers of the target language for two to three minutes after only one year of twice-weekly 90 minutes of instruction. In particular, this contribution deals with
- the reasoning, based on students' requests,,
- the development of the examination
- characteristics and conditions of the examination, such as technical and human resources requirements; and
provides one practical example, including self-scoring. A break out session should discuss how this examination can be realized in yet other foreign language contexts. Finally, difficulties to overcome and prospects for developing it even further than present tests for English will be considered.

Overall context

- 1. Introduce author's speaking test and explore application to other FL teaching contexts
- 2. The aim here is to help those who would like to do similar courses and stimulating examinations both practically and theoretically
- 3. This is also an example for the wider relevance of any 2FL research for yet other FL teaching

教員は会話の特徴を、授業で行う対話ルールとして、いくつかの規定を設け、受講生に慣れさせます。これらも授業時間内で詳しく説明する時間がないため、moodleに乗せて簡潔な紹介で済ませる。その中に例えば次のようルールがある：

— 十秒以上話さないと「切れ」と捉える。

— 相手を見ること

— 相手に母国語の助け船を出さない、しかし目的言語での助けは歓迎である。

— 英語・日本語など目的言語でない言葉を使用するのはダメむしろ

自分を見せる場としての試験にすること

自信を持って話すこと(直前準備字は10だったのにに対して、口頭試験は長くて3~4分)など (いざれも授業ファイルから)¹⁹

- Multiple Rater rating, interrater correlation (practicality!)
- Strictness value
- Configured for every rater from the sum of all points given in one criterion by the number of students (=average) for each criterion and again sum and average thereof for all criteria
- Objectivity

Effect of even more raters' rating presently being investigated
(Reinelt Three raters Sept 2010)

No significant increase observed >

for practical purposes one rater for each kind (criterion referenced and holistic) sufficient

B, II Learner dyads rated over Skype WS 2009 Fr6

- scorer in the target language country watches over Skype
- (increase in) learner motivation being scored by native speaker
- relieves the pressure on getting sufficient qualified target language speakers in Japan
- difficulty: How to prove overseas raters actually scored? (and not just entered numbers?!)

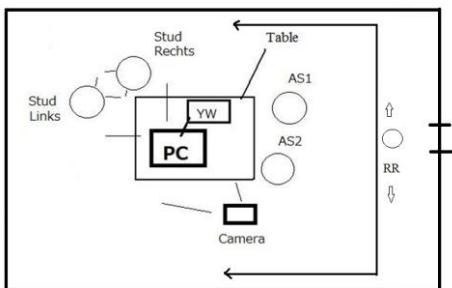

25

JALT 2010 11 20 OLE Rein AdjRRSTtoOther2FL

- difficulty: How to send the money? Ministry order (not internationalized). Even former exchange students have to dissolve their accounts before departure
- So far, costs covered by general education dept; cultural exchange bag. Scorers not necessarily students
- recruiting scorers overseas (in Germany): How? Add, spread of word, what about "no training"
- - Recruiting "willing speakers", i.e. ready to spend a few minutes as scorer with the testee

- **C, III) learners speak with target language NS in Matsuyama**
- Since then (III) WS Mi2: *speak with new German native speaker (exchange student)*
- - win cooperation of willing native speaker exchange student
- - some knowledge about Japan (but not as condition, how can this be figured in the qualification as a rater?)
- - presently experiencing Japan
- - difficulty: speaking with the student and afterwards rating him/her

30

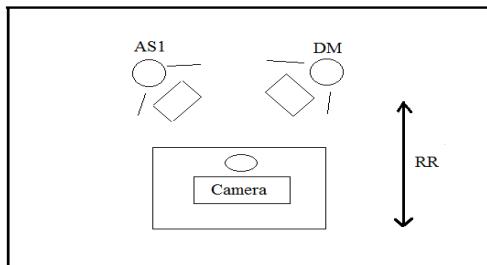

JALT 2010 11 20 OLE Rein AdjRRSTtoOther2FL

- How can we prove raters actually scored? (and not just entered numbers?!)
- one issue solved: Sending the money to an account in Japan is easy: Ministry order
- So far, costs covered by general education dept; cultural exchange bag. Scorers not necessarily students
- recruiting scorers may be difficult if no target language NS in the area
- "no training", so far only being given description of the project
- So far easily recruiting "willing speakers", i.e. ready to spend a few minutes as scorer with the testee
 - However: This is not guaranteed!

- Points for discussion, possible further progress:
Technical point: Skype allows up to six participants. Thus:
Get two students in different locations
 - to rate the conversation independently
 - To talk with the students (in order to decrease burden of native speakers)
 - (also ask miyake, friend of her)
 - (+ using various NSs)
 - Makes such media use a necessity for any language course
 - Increases (faculty development) requirements of teachers:
Always offer the best, and if applicable, most technically advanced courses to your learners
 - Next step: Commercial software (NIFLAR)

- (Even if this is only a test situation with all its deficiencies;)

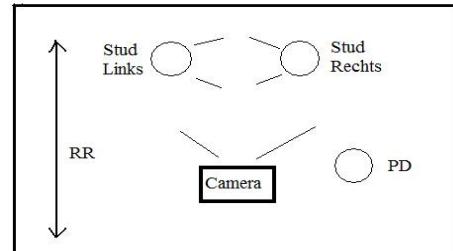

Note that this constellation also fulfills the goal of FL learning: Speak to a new user of the target language without preparation etc.

It even fulfills the “willing speaker” requirement

Comments and discussion

- Solves the problem of providing a partner: Partner from a parallel class
- Fulfills some students expectations to get to know new people (!)
- Teacher cooperation required

- Comments from former students or others who saw the tests accidentally or came to see them:
 - - my life would have been different
 - - what could I do after one year
 - - a university English professor : They speak even more than OUR students
- And what have we learnt in 6 years of English?
